

Presentations Workshop

1. For my body of work, I will run a session on presentations at our CTA ran mini conference. A goal of my body of work is to encourage younger members to do presentations. Another goal is to expand the knowledge of members on all of the different types of presentations there are.
2. The 4-H members participating will do the following:
 - Members will learn about different presentations
 - Members will learn how to properly present a presentation
 - Member will learn that presentations are really fun
3. The resources I will need to properly execute my body of work include the following, possibly adding more in the future:
 - A space to hold the mini conference
 - Members of ages 9-12
 - Props the demonstrate different kinds of presentations
4. We will make flyers and I will videotape my session to document my bod of work. I will also have a script to read off of.
5. To see if my project is useful and successful, I will see who went to the mini conference and who went to county presentation day. I

will also measure if there was an increase in participants at county presentation day as apposed to last year.

6. To start, I will need to plant to plan the mini conference with my fellow CTAs and plan a time slot for my workshop.
7. The 4-H age that will benefit is 4-Hers of the age of 4th to 6th grade. All clubs in the Monterey County will benefit. Leaders council will benefit because the will have more active members.
8. Obstacles I may face will be getting members to come to the conference, keeping members engaged, and inspiring the members to do presentations.
9. Something that may interfere is lack of members coming to the mini conference. We can overcome this by giving more publicity to the conference.
