

Central Coast Vineyard News

University of California

Agriculture and Natural Resources | Cooperative Extension

November 30, 2012

An informational brochure has recently been produced by Mysore Sudarshana, Plant Pathologist, USDA-ARS, UC Davis and Jim Wolpert, Viticulture Extension Specialist, UC Davis on the newly discovered viral disease 'Red Blotch Disease.' The symptoms of this infection distinguish it from leafroll virus expression, as does its PCR fingerprint. For a description of the symptoms and diagnosis presented in this brochure click [here](#).

About the UC Cooperative Extension

The University of California Cooperative Extension offices are local problem-solving centers. Campus-based specialists and county-based farm, home and youth advisors work as teams to bring the University's research-based information to Californians. UCCE is a full partnership of federal, state, county, and private resources linked in applied research and educational outreach. UCCE develops and extends timely and pertinent information in a manner, which is independent, unbiased, noncommercial, and research based. These fundamental criteria set it apart from all other information resources.
