Managing Water in the Vineyards

The American Society for Enology and Viticulture National Conference will be held in Monterey during June 27-30, 2016. This year's program will start off with a full-day water symposium using California vineyards as the example for the many topics covered that will include water stress, irrigation, and coping mechanisms during drought conditions. Also this year, those attending will receive 7.0 CCA CEU credits.

This symposium brings together world-renowned speakers who will provide a comprehensive view of how to manage vineyards, and discuss research and tools currently used.

Take a look at the topic lineup and consider attending this symposium. Register today.

About the UC Cooperative Extension

The University of California Cooperative Extension offices are local problem-solving centers. Campus-based specialists and county-based farm, home and youth advisors work as teams to bring the University's research-based information to Californians. UCCE is a full partnership of federal, state, county, and private resources linked in applied research and educational outreach. UCCE develops and extends timely and pertinent information in a manner, which is independent, unbiased, noncommercial, and research based. These fundamental criteria set it apart from all other information resources.
