

The UCCE Monterey County office will be accepting samples during the shelter in place order issued by the County of Monterey. For the safety of our employees and our clients we will implement the following procedure to drop off samples at our office in order to comply with social distancing guidelines that are currently in place.

Samples can be dropped off on Mondays, Wednesdays and Fridays from 8:00am to 5:00pm. Do not drop off perishable specimens on other times, since they won't be refrigerated.

Fill out the sample form that is provided at the front counter, outside the roll-down curtain. The Blue form for Entomology, Orange form for Vegetable Crops and Weeds, Yellow form for Viticulture and Green for Pythium Suspect.

Tape the filled out form to the outside of your sample. Please make sure that both your contact phone number and email are clearly indicated.

The sample should be placed in a plastic bag or container that you bring; none will be provided.

Place sample in the black box labeled "SAMPLES" outside the roll-down curtain.
